

'working @ height compliance specialists'

Our Company

XI Training is the leading working at height compliance specialist organisation in the UK.

Providing a comprehensive range of services including consultancy, BS 8454:2006 compliant working at height training and industrial courses, our services allow you to manage your working at height training and compliance across a wide range of industry sectors.

As well as supporting self employed contractors and SME's, XI Training works in partnership with some of the largest organisations in the UK, such as BAE Systems, British Transport Police, British Telecom, Motorola, Network Rail and the National Health Service.

In short, a wide selection of specialised working at height and rescue courses are complemented by an extensive support framework which takes a lot of the pain away from ensuring that you and your business can keep on working within the current UK regulation and certification requirements. We supply all rope access PPE and kit requirements, as well as a fully managed PPE Inspection Service to comply with health and safety standards and health and safety law – we can even provide you with Industrial Climb and Rescue Medical Certification.

Note:

- I. BS ISO 22846-2:2012 – The code of practice for protection against falls including rope access systems.
- II. BS 8454:2006 – The code of practice for delivery of training and education for work at height and rescue.
- III. BS 7985:2013 – The code of practice for the use of rope access methods for industrial purposes. Recommendations and guidance supplementary to BS ISO 22846.

“

We have been using XI Training for a few years. All our delegates have very positive feedback about the entire training process, professionalism of the trainers, knowledge and delivery methods. The staff are always available to answer queries and solve any issues.

”

Arcangela Rocha, HSEQ Co-ordinator, WHP Telecoms LTD

Our Courses

XI Training provides an extensive range of work at height training courses designed for an increasing number of diverse industries and specialised market sectors.

We offer highly engaging, industry focused training, and supporting services, to help your company manage its health and safety compliance. Our courses are underpinned by the 'Work at Height Regulations 2005', providing both regulatory compliance and practical solutions within the workplace environment. In addition to delivering nationally approved training courses, we are also able to provide specific – tailor made – courses for your company or department.

Our experienced training team will provide advice and support to identify your individual course requirements and training can be delivered at your own site or at our purpose built training facilities – based in Lancashire, just a mile from the M6.

XI Training's facilities include a purpose built training centre with 4 storey climbing workshop, classrooms and catering facilities, in addition to a number of external climbing towers – all of which provides the right environment in which to get properly trained and assessed. Our partnership with the Royal Station Hotel in Carnforth meanwhile, provides a fantastic option for excellent value accommodation and hospitality throughout the year.

The training was very detailed from a practical and written perspective and both elements were extremely informative. The XI team are extremely flexible and offer advice on the most suitable course to go on for the required training needed. The training facilities are excellent and are still expanding. XI supply excellent equipment at very reasonable prices and they offer good advice on the correct type of equipment to use for the task you are going to undertake.

Rob Mahon

HSQE Field Supervisor, M J Quinn Integrated Services Ltd

Our clients

With twenty years' experience in working at height training, XI Training provides a comprehensive range of services to a broad client base. We work to the very highest standards to offer bespoke training programmes to a variety of industry sectors, including government; not for profit organisations; warehousing and logistics; emergency services; and telecommunications.

Our practical health and safety experience and dedication to delivering the most up to date and comprehensive safety training solutions, ensure that we remain at the forefront of the working at height training industry.

It also means that our customers keep coming back to us – time after time!

“

The team at XI Training is first class and understands our business exceptionally well. XI worked with MMX to produce tailor made MMX field engineering training courses to complement our business... and the XI team regularly monitors training and inspection records, providing MMX with available training and inspection dates prior to expiry.

Maria Taggio

HR, Operations & Management Systems Director
MMX Communications Services Limited

”

XI Training is delighted to be partnering with The Royal Station Hotel in Carnforth. Just a few minutes away from our training centre, the hotel is situated in the heart of the small market town and overlooks the historic Carnforth railway station, made famous as the setting for the 1945 classic Noël Coward film, 'Brief Encounter'.

With the Lake District National Park, the Yorkshire Dales, the Trough of Bowland, the ancient city of Lancaster and Morecambe Bay all on the doorstep, the Royal Station is the perfect place to stay as part of your training course experience. You'll be able to choose to dine in style, selecting one of the mouth-watering dishes from the à la carte menu in our cosy restaurant. Or you may prefer to opt for a dish from our bar menu, where we can offer a selection of traditional pub favourites.

Whatever you choose, we're sure that you'll want to come back and visit us again!
